

FRONTEND DEVELOPER

SUMMARY

I finished my degree in Food Science Technology, although I've found my passion in software engineering, especially as a front-end developer.

I am a highly motivated developer seeking to launch a career building web applications and services.

EXPERIENCE

<https://Alberto-lanchas.web.app/>

Freelance (May 2022 – Oct 2022)

I've collaborated with a variety of customers as a freelancer, creating projects mostly in HTML5, React (Hooks), Javascript (ES6+), and CSS (SASS & BEM).

These projects have allowed me become a better frontend developer and programmer, which has helped me become more proactive and motivated to keep getting better.

- Using Web components to create applications.
- Interacting with various English-speaking clients.

PROJECTS

Crypto Charts (Jan 2022 – Oct 2022)

It's a Cryptocurrency Tracker App with React JS. App full responsive functionality. I use React Hooks as useState, useEffect and useContext. Besides, I included Firebase to add features like Google Authentication and Firestore with CRUD operations.

- Deploy a React App with Firebase Hosting.
- Create Charts using Charts JS
- Make a User Interface with Material UI

Tech Stack: React, Firebase, Chart JS, React Router DOM & Material UI.

Rick & Morty (Jan 2022 – Oct 2022)

It's an API REST App base on the television show Rick & Morty. Includes React pagination to display the data, filters to clarify the characters, and React Router Dom to navigate into different specific details of each character.

- Make beautiful components with Bootstrap.
- Data fetching from API REST & Pagination
- Filter data from a real-time database.

Tech Stack: React, Sass, Bootstrap & React Router DOM.
